This program will prepare graduates and upper-level undergraduates as multiculturally competent educators, professionals and leaders. Based in Beijing, China, students will explore the educational system and practice, or social and cultural issues, through an independent research project. Students will engage with students from Beijing Normal University and Beijing Royal School in China to collaborate on projects, and will visit these schools and the community while in country. Students will participate in assessment, evaluation, intervention and research activities as a part of this program. The program will also visit Xian, including the Terracotta Warriors.
